

Online Appointment Booking System [Sprint Planning Notes](#)

[Team:](#) 6.TUES-18.30-3

[Sprint:](#) 1

[Date:](#) 15/08/20

[Attended:](#)

[Scrum Master:](#) Oscar Ling

[Product Owner:](#) Mohammad Ali

- [Development team:](#)
 - Andhika Laksito,
 - Indirakshi Sreeram,
 - Yuepeng Du

1. [Goal](#)

Set up a basic functional application that will allow the booking of appointments for AGME, and also allow the management of these appointments and the employees of the company.

2. [Duration of the sprint](#)

2 weeks

3. [What is the team's vision for this sprint?](#)

General: Ability to Sign in and Sign Up as an admin, worker or customer, as well as see details on the company including contact details and description of the company.

As a worker: The ability to see dashboard and access appointed working schedules and details within

As an admin: Able to designate working hours of the company and add members into the worker team

As a customer: Able to create appointments and bookings and see details of such bookings

We believe these are the essentials to which the applications may be deemed functional.

4. Estimation in story points

As a Customer, I would like to create/ Sign Up for an account so I can use the application. **(20)**

As a Registered User, I would like to create an appointment with a service provider so I can book a time with them. **(20)**

As an employee, I would like view the company dashboard so I can track my current booking and assigned working hours. **(20)**

As a customer I would like to find out how to contact the business so I could directly contact them if I need. **(5)**

As a customer, I would like to view my appointment details so I can track the date/time of the booking. **(20)**

USER STORY - As a customer, I would like to log in so I can view available time and date for a service. **(20)**

As a customer I would like to learn more about a business via a webpage so I can know what kind of business I am enquiring a service from. **(3)**
